

# Care Advisory Services

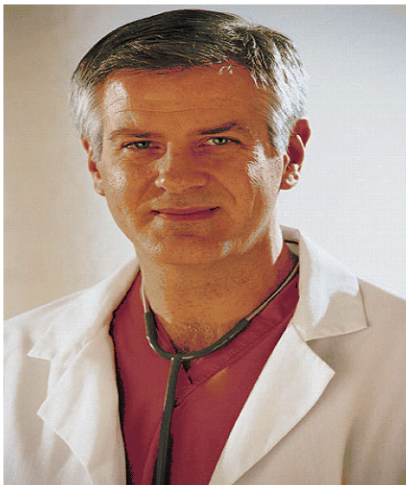

**Assessment** will measure the person's ability to perform the basic activities of daily living such as bathing, dressing, eating and mobility.

**Care Advisory Services** help to assess and care planning by a Home Health Agency, a Care Management Organization or Independent Care Manager.

**Care Management Services** an organization which is licensed to provide Care Advisory Services according to the laws of their jurisdiction and has a full-time administrator. They must maintain records of services provided to each client. Their staff must include a registered nurse, licensed social worker, an individual that holds a "Care Manager" designation or has a Masters in Gerontology.

**Care Manager** is a person who is usually a registered nurse or licensed social worker that assesses the needs of the patient. They coordinate the delivery of long-term care and services which they monitor throughout your period of care.

**Licensed Health Care Practitioner** is a Physician, a registered nurse, a licensed social worker, or any other individual who meets the requirements of licensing prescribed by the State in which care is provided.

**Plan of Care** means a written plan for long-term care services designed especially for you. This Plan of Care must specify the type, frequency and providers of all the services you require; and be in accordance with accepted medical and nursing standards of practice. A Licensed Health Care Practitioner must approve Your Plan of Care.
